

Roof Safety – Self Survey

Safety First: If you choose to access roof areas to complete this survey, please be sure to take all necessary precautions to stay at safe distances from leading edges and other hazards until the appropriate protective systems can be installed. If you are uncertain about safe rooftop practices please consult your safety department and osha.gov prior to accessing any rooftop.

How To: Use this preliminary self-survey questionnaire to identify rooftop areas requiring protective rooftop systems. When complete forward this form to debra.hilmerson@hilmersonservices.com. If you have any questions please contact Hilmerson Safety at 952-224-9392
